

Made from nature. Made to last.

WHAT IS VENEER-ART[®]?

- Veneer-Art is a high-performance, pre-finished wood veneer made from natural (not reconstituted) wood veneer.
- The sheets of veneer are impregnated with melamine resin and fused with phenolic resin-impregnated kraft sheets.
- Veneer-Art's exclusive Tru-Grain[™] finish preserves the natural texture and beauty of each individual species.
- Veneer-Art boasts heat, water, scratch and dent resistance properties that far surpass those of conventionally finished veneers, as well as other pre-finished veneers or wood laminates with a urethane or wax finish.
- It is easy to install and can be fabricated with the same tools, adhesives, and substrates typically used with high-pressure decorative laminate.

	VENEER-ART [®]	TRADITIONAL VENEER	NON MELAMINE-FINISHED WOOD LAMINATES

WHERE CAN I USE VENEER-ART®?

Veneer-Art has been installed in many public and commercial environments over the last 25 years.

It is perfectly suited for architectural applications in high-traffic environments, as well as on commercial furniture, fixtures and casework, such as:

- architectural doors
- wall paneling
- elevator cabs
- reception areas
- transaction counters
- table tops
- cabinets
- hospitality furniture
- restroom vanities and partitions

Cook County Domestic Violence Court House, Chicago, IL
Wall paneling in hallways and court rooms, elevator banks, ceiling panels in atrium and hallways.

Lakeline Mall, Austin, TX
Banquettes and casework in food court.

Clubhouse at Windstar on Naples Bay, Naples, FL
Wall paneling, column wraps and other architectural elements in foyer; bar front and architectural elements in restaurant/lounge.

The Gardens Mall, Palm Beach Gardens, FL
Wall paneling, staircase and escalator siding, and other architectural applications throughout the mall; casework in food court.
